THE COMP-CASE STORY

All COMP-CASES by COMPUTER CASE COMPANY are constructed of the highest quality luggage material with hard sides, corner protectors, and two key locks. Rubber pads provide furniture protection, and steel lugs on the bottom protect the case when transporting. The outside is covered in the highest quality scuff resistant textured vinyl. The tops are easily removed so that the equipment can be operated without removal from the case. Provisions are made for cords to exit the case even when the top is on and locked, to provide convenient security without the need to disconnect electrical cords and cables. Storage space is provided for manuals, cords, working papers, and supplies within each case.

All COMP-CASES have been extensively checked and tested to insure that the case in no way inhibits the proper operation of the installed equipment. Air circulation is maintained for proper cooling. Access to all controls, plugs and jacks is ensured. Hold-down facilities are tested for strength and durability.

COMP-CASES are also available for other computers such as the ATARI and TRS-80, with matching cases available for printers and other peripheral equipment. Additional cases are being developed as the need arises. Special requests will be appreciated.

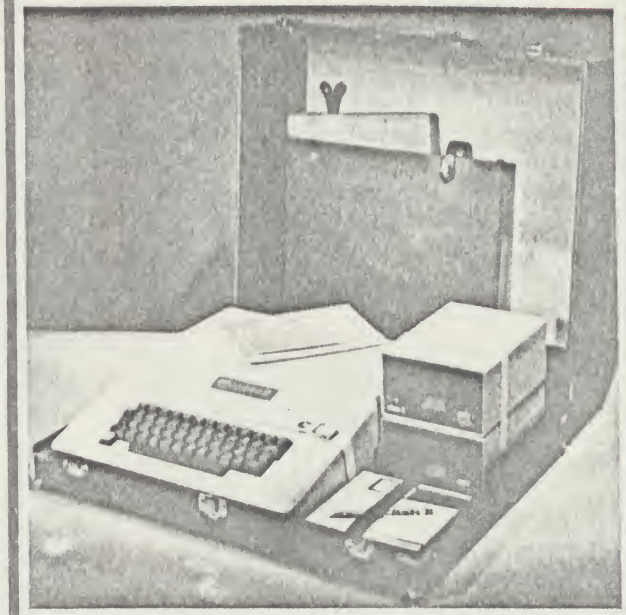

You can be confident that a COMP-CASE will meet your every requirement for quality, protection, security, and portability in an attractive case you can be proud of - - and we guarantee it.

COMPUTER CASE COMPANY

Introduces the

APPLE CASE

* Apple II is a trademark of Apple Computer, Inc.

This attache style case has been designed specifically to hold the APPLE computer along with a disc drive or tape recorder in a fully operational configuration. No need to disconnect and reconnect cables each time the computer is moved. Simply plug in the power cable and connect the monitor and you are in business. The removable top has storage space for manuals, discs, tapes, working papers, and other necessities. An elastic strap in the base provides handy storage for floppy discs or tapes. The computer and disc drive (or tape recorder) are held in position with security straps and cradled in foam rubber for protection when operating, transporting, or in storage.

The case provides not only portability but a convenient method of storage free from possible damage and dust accumulation. By replacing and locking the lid, your valuable computer and software are protected from unauthorized use and tampering. You can easily control access without dismantling the setup. Delicate cables are protected from possible inadvertent damage or fatigue failure due to repeated connecting and disconnecting.

Whether you are interested in transporting your APPLE computer to and from the office, carrying it as luggage on the airlines, providing temporary storage while your desk is being used for other things, or simply for security and dust protection, the APPLE CASE is an invaluable accessory for your computer.

SECURITY: Prevents unauthorized use and tampering.

PROTECTION: Provides a secure means of storage free from dust and protected from damage.

PORTABILITY: Your APPLE can be carried, then operated without removal from the case.

QUALITY: Made from the best luggage construction material.

Deluxe Case $109.00

Deluxe Case sized for two disc drives $119.00
